PROSPECT HILL POND  
(Taunton)

General Information:

This 42-acre warm water pond has an average depth of about four feet and a maximum depth of seven feet. Transparency is low at four feet. The Pine Swamp Brook feeds it.

The pond is located about two miles north of Taunton Center. To get there from Route 495, Exit 9, take Bay Road south past Lake Sabbatia, then take a left onto Waverly Road. Access is a dirt road (town right-of-way) at the end of Waverly Road. This is a dirt access suitable for launching car top boats and canoes.

Fish Populations:

This pond was last surveyed in 1969. White perch were abundant at that time. Other species included largemouth bass, yellow perch, black crappie, pumpkinseed and American eel.

Fishing:

This shallow pond is fairly fertile and offers good fishing action for both largemouth bass and panfish.
